

# HONMA BERES SHAFTS 1

## ARMRQ High Performance Shafts

- Distance potential increases with the grademark

# HONMA BERES SHAFTS 2

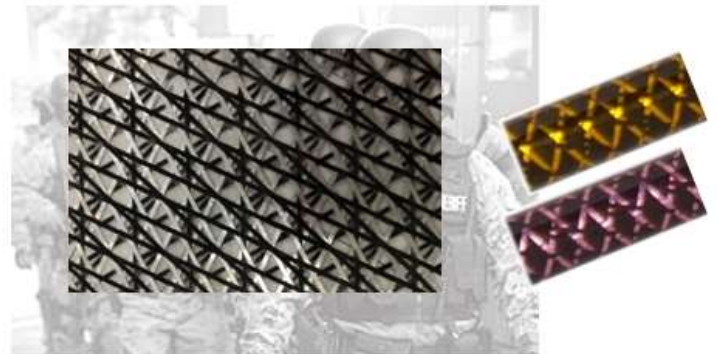

- Metal Hybrid Armor Technology

- 2S, 3S, 4S, 5S

- New 7-axis material

- Consists of 2-axis aluminum + 5-axis carbon weave
- Higher compression strength
- Reduces ovalization in the butt for stability
- Creates additional 5mm counterbalance for increased swing speed

- Twist Fleuret Technology

- 3S, 4S, 5S

- Combination of new M40X + proven 1100G materials transfer energy from player to shaft to head more efficiently

- New M40X material from Torayca

- High elasticity, high fiber strength material
- “Shape memory” reduces energy loss, increases distance potential
- Stronger than 1100G
