OUR FASTEST, MOST STABLE DRIVER EVER

THIS IS SPEED TUNED

The New Rogue ST Family represents the next step in our quest to continue pushing the boundaries of innovation. Like a Formula 1 racing team that analyzes and makes improvements to every element of the car to achieve maximum performance, our R&D and Engineering teams have re-invented, refined, and improved every element of each club while developing the Rogue ST Family.

CORE TECH

TUNGSTEN SPEED CARTRIDGE WITH ANODIZED ALUMINUM BACK CAP
Increases speed on off-center hits. It also adds stability at impact, and enhances MOI.

JAILBREAK A.I. SPEED FRAME

New A.I. driven design provides stability and adds even more ball speed.

SPEED TUNED A.I. FACE

New A.I. optimization formula now includes speed, launch, & spin.

NEW UNIBODY CONSTRUCTION WITH TRIAXIAL CARBON CROWN & SOLE
Promotes increased stability, saves weight, and adds forgiveness.

ROGUE ST MAX D

Rogue ST Max D is for the golfer that needs a high level of draw bias from their driver. It's built for very high MOI, with a more upright lie, reduced face progression, along with internal and external draw weighting, and a generous/stretched profile at address for maximum shot shape correction.

Rogue ST Max D Driver Specs

EPIC SPEED

What happens when the undisputed ball speed leader goes out and creates a NEW formula for speed that doesn't even seem possible? The answer is.... you get the new Epic Speed, our fastest driver ever. Epic Speed is built on a simple equation that's going to make a profound impact on the category. A.I. + Jailbreak + our new Speed Frame = more distance for every player. The future of driver technology and performance is here, and it's about to change the industry forever.

FEATURES & BENEFITS

Extraordinary Ball Speed From NEW Jailbreak A.I. Speed Frame

Epic ball speeds start with our new A.I. Jailbreak Speed Frame. Previous Jailbreak designs stiffened the body in the vertical direction. By applying Artificial Intelligence, the new design improves stability in the horizontal and torsional direction as well. The result is exceptional ball speeds all across the face.

Fast Ball Speed From A.I. Designed Flash Face SS21

Our advanced A.I.-designed Flash Face promotes fast ball speeds across a more expansive area. Each face and each head geometry are uniquely optimized in Epic, and the super strength titanium promotes optimal speed, forgiveness and spin robustness. This all results in a greater emphasis on center and off-center ball speeds.

Our Fastest Driver Head From A Cyclone Aero Shape

This advanced aerodynamic head construction promotes lower drag for higher head speed and ball speed. The taller ribbon and flatter crown are engineered for a new shape that can help golfers generate more speed from their swing.

Increased Forgiveness From Advanced Composite Design

Our proprietary Triaxial carbon covers a larger portion of the crown, leading to weight savings of over 18 grams vs. a titanium crown. Callaway engineers have redistributed that saved weight to enhance forgiveness versus previous Mavrik designs. An additional Triaxial carbon toe patch adds draw bias while saving weight to promote a powerful shot shape.

MODEL	9°	10.5°	12°
LOFT	Adjustable (9°)	Adjustable (10.5°)	Adjustable (12°)
LIE ANGLE	58°	58°	58°
LENGTH	45.75"	45.75"	45.75"
CLUBHEAD VOLUME	460cc	460cc	460cc
SWINGWEIGHT	D2/D3/D4	D2/D3/D4	D2/D3/D4
LEFT HAND	Yes	Yes	Yes

*Effective Jan 1, 2020, all club lengths will be based on USGA measurement procedures. Some published lengths have changed but the actual club lengths are the same as previous models. Shaft specifications may vary due to cut length and manufacturer tolerances. Shaft weights listed indicate weight class (40/50/60/70g). Actual weight is dependent on flex and cut length, D2/D3/D4 swingweight is dependent on the weight of the shaft. Epic Speed Women's lengths are 1.25" under the Men's lengths listed above.

EPIC MAX™

When the industry's ball speed leader develops a NEW formula for speed and puts it into our most forgiving Epic ever, that's a truly special achievement. In fact, the new Epic MAX is a remarkable engineering feat for golfers who want to hit the ball longer and straighter than they ever have before.

This driver is built on the simple equation that A.I. + Jailbreak + our new Speed Frame = more distance. We've engineered all of this speed into a high launch, high MOI model that also features significant adjustability to tune ball flight. The future of MAX driver technology and performance is here, and it's about to change the industry forever.

FEATURES & BENEFITS

Extraordinary Ball Speed From NEW Jailbreak A.I. Speed Frame

Epic ball speeds start with our new A.I. Jailbreak Speed Frame. Previous Jailbreak designs stiffened the body in the vertical direction. By applying Artificial Intelligence, the new design improves stability in the horizontal and torsional direction as well. The result is exceptional ball speeds all across the face.

Fast Ball Speed From A.I. Designed Flash Face SS21

Our advanced A.I.-designed Flash Face promotes fast ball speeds across a more expansive area. Each face and each head geometry are uniquely optimized in Epic, and the super strength titanium promotes optimal speed, forgiveness and spin robustness. This all results in a greater emphasis on center and off-center ball speeds.

Our Most Forgiving Epic Ever

Epic MAX creates exceptionally high forgiveness, starting with a lighter, stronger Triaxial crown that saves over 18 grams of weight. Our engineers have redistributed that saved weight to promote high launch and more forgiveness. Epic MAX delivers an exceptional combination of a deep CG, draw bias and higher MOI for a tighter downrange dispersion that leads to straighter drives.

More Control From Adjustable Perimeter Weighting

With a 17g sliding rear weight, golfers have infinite adjustability to promote the ball flight that they want to play. Combined with the OptiFit hosel, the Epic MAX provides up to 20 yards of shot shape correction.

EPIC MAX LS™

The industry's ball speed leader has developed a completely NEW formula for speed that low spin players will love. Introducing the Epic MAX LS Driver, an ultra-high MOI offering for mid- to- low handicap players who want to more speed and forgiveness in a low spin package.

This driver is built on the simple equation that A.I. + Jailbreak + our new Speed Frame = significantly more distance. We've engineered all of this speed into a driver for the ultimate combination of distance and shot shaping off of the tee. The future of low spin driver technology and performance has arrived.

FEATURES & BENEFITS

Extraordinary Ball Speed From NEW Jailbreak A.I. Speed Frame

Epic ball speeds start with our new A.I. Jailbreak Speed Frame. Previous Jailbreak designs stiffened the body in the vertical direction. By applying Artificial Intelligence, the new design improves stability in the horizontal and torsional direction as well. The result is exceptional ball speeds all across the face.

Fast Ball Speed From A.I. Designed Flash Face SS21

Our advanced A.I.-designed Flash Face promotes fast ball speeds across a more expansive area. FAIRWAYS

OUR FASTEST FAIRWAY WOOD EVER

THIS IS SPEED TUNED

The New Rogue ST Family represents the next step in our quest to continue pushing the boundaries of innovation. Like a Formula 1 racing team that analyzes and makes improvements to every element of the car to achieve maximum performance, our R&D and Engineering teams have re-invented, refined, and improved every element of each club while developing the Rogue ST Family.

CORE TECH

ALL NEW JAILBREAK ST

New A.I. Jailbreak Design is speed tuned to create more stability by pushing the structure to the perimeter. This allows the face cup to flex more, creating incredible ball speed.

NEW TUNGSTEN SPEED CARTRIDGE

Allows for a precise, forward CG location promoting optimal launch and more ball speed.

SPEED TUNED A.I. FACE OPTIMIZATION

New A.I. optimization formula now includes speed, launch and spin. It's unique for each model and each loft.

HIGH STRENGTH C300 FACE CUP

Specially treated high strength steel for more ball speed and ball speed consistency.

ROGUE ST MAX D

The Rogue St Max D is for the player who needs more draw bias in their fairway woods. It's also our highest launching Rogue ST Fairway model.

Rogue ST Max D Fairway Wood Specs

MODEL	3W	5W	7W

EPIC SPEED

A new era of speed is coming, and it's going to lead a fundamental shift in the fairway wood category. In 2021, fast is going to get faster, long is going to get even longer, and straight is going to get a lot straighter. How is all of that possible? It's simple, we've set a new bar in ball speed technologies in our NEW Epic Speed Fairway Woods.

FEATURES & BENEFITS

Extraordinary Ball Speeds from NEW Jailbreak A.I. Velocity Blades

Epic ball speeds start with our new Jailbreak A.I. Velocity Blades. Callaway engineers used A.I. to design a completely new Jailbreak system which spreads and angles the Jailbreak blades. Along with stiffening the body, the new design improves stability in the horizontal and torsional direction as well. The result is exceptional ball speeds all across the face.

Fast Ball Speed From A.I. Designed Flash Face SS21

Every model and every face in our fairway woods are uniquely designed using advanced A.I. It's a proven ball speed design that puts an even greater emphasis on center and off-center ball speeds.

More Speed + Forgiveness From a Forged C300 Maraging Steel Face Cup

The high strength C300 Maraging Steel provides outstanding strength and flexibility while the Face Cup provides speed and spin consistency across the face.

Strong, Piercing Ball Flights from a Forward CG

The forward Center of Gravity (CG) provides a strong ball flight and outstanding spin robustness. Combined with a new leading edge design, the Epic Speed fairway wood provides driver-like performance.

Along with stiffening the body, the new design improves stability in the horizontal and torsional direction as well. The result is exceptional ball speeds in a design that's easy to launch.

Fast Ball Speed From A.I. Designed Flash Face SS21

Every model and every face in our fairway woods are uniquely designed using advanced A.I. It's a proven ball speed design that puts an even greater emphasis on center and off-center ball speeds.

More Speed + Forgiveness From a Forged C300 Maraging Steel Face Cup

The high strength C300 Maraging Steel provides outstanding strength and flexibility while the Face Cup provides speed and spin consistency across the face.

Easy to Launch From Adjustable Weighting

An oversized head combines with a shallow face and a low leading edge to make Epic MAX fairways extremely easy to launch. Launch and spin are tunable using 2g & 14g weights.

LEFT HAND	No	Yes	Yes	No	Yes	No	No

*Effective Jan 1, 2020, all club lengths will be based on USGA measurement procedures. Some published lengths have changed but the actual club lengths are the same as previous models. Shaft specifications may vary due to cut length and manufacturer tolerances. Shaft weights listed indicate weight class (40/50/60/70g). Actual weight is dependent on flex and cut length. D2/D3/D4 swingweight is dependent on the weight of the shaft. Epic Max Women's lengths are 1.25" under the Men's lengths listed above.

HYBRIDS

OUR FASTEST FAMILY OF HYBRIDS EVER

THIS IS SPEED TUNED

The New Rogue ST Family represents the next step in our quest to continue pushing the boundaries of innovation. Like a Formula 1 racing team that analyzes and makes improvements to every element of the car to achieve maximum performance, our R&D and Engineering teams have re-invented, refined, and improved every element of each club while developing the Rogue ST Family.

CORE TECH

ALL NEW JAILBREAK ST

New A.I. Jailbreak Design is speed tuned to create more stability by pushing the structure to the perimeter. This allows the face cup to flex more, creating incredible ball speed.

HIGH STRENGTH 455 FACE CUP

Specially treated high strength steel for more ball speed and ball speed consistency.

SPEED TUNED A.I. FACE OPTIMIZATION

New A.I. optimization formula now includes speed, launch, & spin. It's unique for each model and each loft.

SPEED TUNED TUNGSTEN

Allows for precise CG location which delivers optimal launch with more ball speed.

REFINED SOLES

Promotes better turf interaction and versatility.

ROGUE ST MAX

The Rogue ST Max is our longest Rogue ST hybrid model. They are built with slightly stronger lofts and will fit an extensive range of golfers who are looking for speed, forgiveness, and all-around hybrid performance.

GOLF PRIDE TOUR VELVET 360

APEX UW

Apex UW is a high-performance Utility Wood that Tour players love. This unique design combines the best features of higher lofted fairway woods, the best features of hybrids, with a more neutral ball flight. Using direct feedback from world-class pros like Phil Mickelson, Xander Schauffele, and Akshay Bhatia, we've created a multi-purpose club that better players can rely on from the tee, fairway, or rough.

Tour-Inspired Compact, Workable Shape & Optimized Length

The distinct clubhead shaping is inspired by in-depth feedback from Tour pros. It's a compact profile that they want to shape their shots for enhanced control. Club lengths are set between a fairway wood and a hybrid, allowing for versatile playability while still being easier to hit.

High Launch, Consistent Control and Tighter Dispersion

The Apex UW features 17.6 grams of MIM'D Tungsten Weighting per club delivering a precisely positioned the Center of Gravity in a neutral location. This delivers high launch, steeper landing angles, consistent spin characteristics and reduced draw bias.

High Velocity Ball Speeds From Jailbreak A.I. Velocity Blades

Our Jailbreak A.I. Velocity Blades are engineered to allow Face Cup to flex more for explosive ball speed and better spin rate consistency.

Fast Ball Speed From A.I. Designed Flash Face SS21 + Forged Face Cup

Apex UW's unique A.I. designed Flash Face SS21 is forged using a high strength C300 Maraging Steel for more ball speed and better spin consistency across the face.

APEX 21

Callaway has been the #1 Hybrid in Golf for years, and we're constantly introducing game-changing innovations for every segment of the category. That's especially true for the new Apex hybrid, a high-tech design that blends exceptional A.I. ball speed technologies, game improvement features and adjustability in a players shape. This is an extremely versatile, high performance package that can help a wide range of players.

Exceptional Ball Speeds from NEW Jailbreak A.I. Velocity Blades

Our Jailbreak A.I. Velocity Blades are engineered to increase vertical stiffness near the sole of the club, creating more speed low on the face where most players hit their hybrids. These blades allow the Face Cup to flex on the crown for better spin rate consistency, and the bars are spread to enhance torsional stiffness, leading to more forgiveness all across the face.

Fast Ball Speed From A.I. Designed Flash Face SS21

Every model and every face in our Apex hybrids are uniquely designed using advanced A.I. It's a proven ball speed design that puts an even greater emphasis on center and off-center ball speeds.

High Launch With Forgiveness

We've implemented massive tungsten weighting into each loft offering. By doing this, our R&D team positioned the Center of Gravity lower to promote high launch, and to provide more forgiveness on off-center shots.

Enhanced Ball Flight Control

Apex Hybrids come with an adjustable hosel to help you optimize your loft, trajectory and control for even more versatility.

APEX 21 HYBRID

APEX PRO

Introducing Apex Pro, our new players hybrid featuring compact shaping, control and workability. It's a perfect option for Tour pros up to low handicap players who want a high-performance option off the tee, or as a versatile club on long Par 4's and Par 5's. And with new Jailbreak A.I. Velocity Blades, it delivers the consistent ball speed that players want to see.

Exceptional Ball Speeds from NEW Jailbreak A.I. Velocity Blades

Our Jailbreak A.I. Velocity Blades are engineered to increase vertical stiffness near the sole of the club, creating more speed low on the face where most players hit their hybrids. These blades allow the Face Cup to flex on the crown for better spin rate consistency, and the bars are spread to enhance torsional stiffness, leading to more forgiveness all across the face.

NEW A.I. FACE OPTIMIZATION

New A.I. optimization formula now includes speed, launch, & spin. It's unique for each model and each loft.

SPEED TUNED TUNGSTEN WEIGHTING WITH PLAYER OPTIMIZED CG

Allows for precise CG location for optimal launch throughout the set. Each Rogue ST iron model's CG locations are tailored specifically for the intended player type.

PATENTED URETHANE MICROSPHERES

Additional urethane microspheres (up to the 6th groove) optimize sound and deliver pure feel.

HOLLOW BODY CONSTRUCTION

This delivers the look and feel of a players performance iron, with all the distance and forgiveness technologies of a game improvement iron.

ROGUE ST PRO

Designed for low-to-mid single digit handicap golfers, the Rogue ST Pro irons feature hollow body construction in a compact, players shape. It's the most workable Rogue ST iron model, with a thin top-line and reduced offset.

APEX DCB

Introducing Apex DCB, a high performance, forged game improvement iron that deserves to carry the iconic Apex name. The DCB allows more golfers to experience Apex than ever before. They provide the look and feel of a players club with the forgiveness of a deep cavity back design. We've never created anything like this, and we know golfers are going to love it.

The First Apex Iron Designed With A.I.

Our A.I. designed Flash Face Cup is in a forged Apex iron for the first time ever. The unique Flash Face architecture in each iron creates high ball speeds and increased spin robustness for every club in the set.

More Forgiveness Through The Set

Apex DCB is the most forgiving Apex Iron we've ever made. The deep cavity back and enhanced sole width are engineered for easy launch and easy turf interaction out of a variety of lies.

Consistent Launch and Increased Forgiveness

For the first time, we've implemented our Tungsten Energy Core into an Apex Iron. With up to 50 grams of tungsten per iron, we can position the Center of Gravity to promote outstanding launch throughout the set and more forgiveness on off-center shots.

Ultimate Feel

Apex irons are renowned for their iconic feel, and Apex DCB is no different. The forged 1025 mild carbon steel and our patented urethane microspheres deliver exceptional sound and feel at impact, while the improved shaping helps enhance feel through the turf.

APEX 21

Introducing the NEW Apex 21 Irons. This is an extraordinary level of forged performance and craftsmanship never seen before. It's the first forged iron designed with Artificial Intelligence for faster ball speeds, and that's just the beginning. Our world-class R&D team has improved spin consistency using A.I., increased forgiveness from our massive Tungsten Energy Core, and enhanced the shaping for even better turf interaction. Apex delivers superior performance with iconic feel on every swing.

The First Apex Iron Designed With A.I.

Our A.I. designed Flash Face Cup is in a forged Apex iron for the first time ever. The unique Flash Face architecture in each iron creates high ball speeds and increased spin robustness for every club in the set. They're engineered for impressive distance and control.

Consistent Launch and Increased Forgiveness

For the first time, we've implemented our Tungsten Energy Core into an Apex Iron. With up to 64 grams of tungsten per iron, we can precisely position the Center of Gravity to promote outstanding launch throughout the set and more forgiveness on off-center shots.

Forged Blade Feel In A Players Distance Iron

Apex irons are renowned for their pure feel, and Apex 21 is no different. The forged 1025 mild carbon steel and our patented urethane microspheres deliver exceptional sound and feel at impact, while the improved shaping helps enhance feel through the turf.

APEX PRO

Apex Pro is synonymous with Tour distance and performance, from a premium construction that's demonstrably superior and pleasingly different. And now we've made a significant leap forward with our NEW Apex Pro, which features an A.I. design and all new forged hollow body construction. Any scratch or single digit handicapper who wants speed and forgiveness in a players performance iron needs to have these in their bag.

The First Apex Pro Iron Designed With A.I.

Our A.I. designed Flash Face Cup is in a forged Apex Pro iron for the first time ever. The unique Flash Face architecture in each iron creates high COR's for fast ball speeds, and increased spin robustness for every club. This set is engineered for the distance you want to see and better control than you've ever had before.

Ultimate Forged Feel

This is what extremely soft feel is all about. The forged 1025 hollow body construction and our patented urethane microspheres provide a remarkable blend of sound and feel at impact that players expect from an Apex Pro iron.

Consistent Launch with Forgiveness

For the first time, we've implemented a massive Tungsten Energy Core into an Apex Pro Iron. The hollow body construction allows up to 90 grams of tungsten per iron, which is used to improve launch and increase forgiveness.

APEX[®] TCB

INSPIRED BY THE TOUR

WHAT HAVE WE CREATED

A Tour-inspired forged 1025 players' cavity back iron.

WHO IS IT DESIGNED FOR & WHO WILL BENEFIT

Specifically designed for Tour/elite players with a spec package of lofts, bounces, blade lengths and COR for use by the stronger player.

Similar footprint to X FORGED 18 but now using a 1025 Forged Hollow Body Construction coupled with 17-4 tour tuned face plate + visible MIM tungsten weighting to maximise performance.

LAUNCH PLAN

The plan is to launch this iron in Europe to all proponent accounts and premium fitting accounts. This will be a custom only offering within APEX 21 family.

APEX MB

Our Apex MB Irons are built for the best players in the game. It's a beautiful & classic blade shape with high performance grooves, remarkable feel, and a new weight design. This is a premium muscleback in every way.

FEATURES & BENEFITS

Tour Shaping and Design

A classic shape and style, with a traditional, thin topline, refined sole, compact blade length and stunning chrome finish.

High Performance 20V Grooves

Precision grooves are designed to promote the high level of control and consistent spin that muscleback players expect out of any playing conditions. The 20V grooves also stand out for reducing fliers from the rough to deliver even more control.

New CG Weighting

We've engineered a new weight in the center of the clubhead. This allows us to precisely dial in swingweights without sacrificing CG location.

X FORGED UT

Utility Irons are a popular choice on Tour, especially as a “fairway finder” off the tee and a versatile club into the green on Par-5s. And our new X Forged UT Irons are packed with Callaway’s best technologies in a confidence-inspiring, hollow body construction. For a better player who wants a new go-to club in their bag, this is the utility iron you’re looking for.

FEATURES & BENEFITS

High Ball Speeds

Our A.I.-designed Flash Face Cup creates a sophisticated face architecture, so we can create high ball speeds with outstanding spin robustness.

Extremely Soft Feel

Forged 1025 mild carbon steel and hollow body construction combine with our proprietary urethane microspheres to create pure feel.

Enhanced Launch And Control

Our external MIM’d tungsten weighting allows us to precisely locate the CG position for optimal trajectory and launch. A longer blade length and a wider sole versus a traditional long iron provide forgiveness and control.

Premium Components

The Project X U is specifically designed to work with utility clubs for stability and control. The Project X HZRDUS Smoke Black HY is a player’s graphite shaft designed with low torque for aggressive swingers. Golf Pride’s Z Grip features a firm feel and exceptional traction.

WEDGES

JAWS

FULL TOE™

EVERY SHOT IN FULL CONTROL

THE ULTIMATE SPIN MACHINE TO TAKE ON
ANY WEDGE SHOT

SPIN MACHINE

JAWS Full Toe wedges combine full face JAWS grooves, offset groove-in-groove technology and an all-new raw face, giving you the spin and control you need to pull off every shot around the greens.

CONFIDENCE & VERSATILITY

The Full Toe shape provides more face area with an enhanced toe peak. The shaping works with the specialized C-Grind to make short shots around the green easy to hit, especially bunker shots and high flops. This wedge is built to perform on mid and full wedge shots too, with great turf interaction so you can stick it close.

CONTROLLED TRAJECTORY

The JAWS Toe Pad pushes the CG higher, for a design that creates a lower, more controlled trajectory. Our Variable Weight Port System helps us locate the CG away from the heel, for solid contact and enhanced feel.

SPIN WITH TEETH

THE MOST AGGRESSIVE GROOVE IN GOLF

New JAWS Groove Design with Groove-In-Groove Technology for Exceptional Spin

Innovative JAWS groove design with extremely sharp edge radius works with our proven Groove-in-Groove technology to impart more spin for precise control.

Precisely Shaped for A Beautiful Look and Extraordinary Feel from 8620 Mild Carbon Steel

Shaped by Roger Cleveland, these premium heads exude quality and superiority from every angle, while also delivering a soft and satisfying feel no other wedge can match.

Two high-end finish options: Platinum Chrome and Tour Grey.

Optimized Head Progression

Head shaping progresses from traditional shaped lob and sand wedges to a compact player preferred design in the gap and pitching wedges for a seamless transition into an iron set.

Premium Components for Premium Performance

ODYSSEY

A BLADE UNLIKE ANY BLADE

TRI-HOT 5K

Multi-Material Construction

These putters use multi-material construction to deliver mass properties unlike any blades on the market, yet they are classic in shape and look in a way that will appeal to the best players in the world. We use Stainless Steel, Tungsten and Milled 6061 Aircraft Grade Aluminum strategically to achieve these amazing results. With inertia levels exceeding 5K in every design and forward cg locations, we have completely re-invented the performance of a blade. Tri-Hot 5K looks like a blade, it feels like a blade, but it performs unlike any blade.

White Hot Insert

The most popular putter insert of all time is back with the original formulation, feel, sound, and performance. When Tour players and recreational golfers asked us to re-introduce it, we listened.

Red Stroke Lab Shaft

As seen on TV – especially on Sunday afternoon! Our latest generation shaft was introduced last season, and now features even better performance than the original! By shortening the steel section, we reduced the weight by seven grams. We also made it stiffer and more stable for even more consistency in your stroke, and your performance. Stroke Lab works, that’s why it’s winning major championships and dominating at the world’s biggest events.

STROKE LAB

FEATURES & BENEFITS

DEEP DIAMOND GROOVE FACE MILL

Our distinguishing diamond mill pattern has evolved to feature full grooves throughout the face. The result is the softest milled putter that we've ever built, while promoting improved immediate forward roll at impact.

PREMIUM MILLED PERFORMANCE

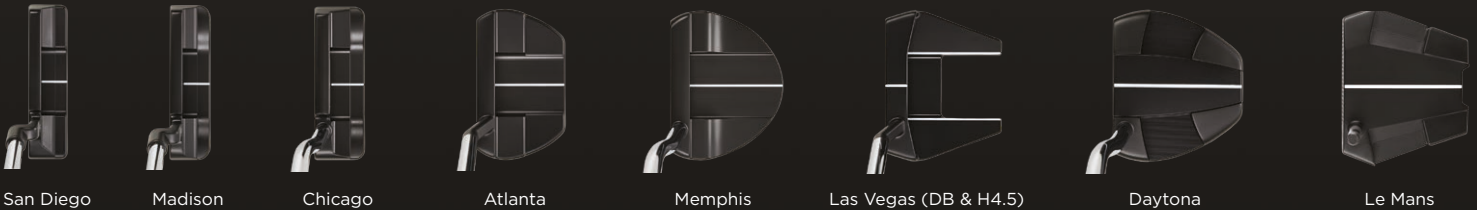

Toulon putters are the best performing milled putters in golf, and the top players in the world are taking notice. We've already earned 38 global wins in just a few years, and we're committed to setting the industry standard for premium designs.

BLACK EMERALD STROKE LAB SHAFT

Our latest generation shaft was introduced last season, and now features even better performance than the original! By shortening the steel section, we reduced the weight by seven grams. We also made it stiffer and more stable for even more consistency in your stroke, and your performance.

MIDNIGHT BLACK FINISH

Toulon is widely recognized for its premium look and construction. The beautiful black finish has been tested and proven on Tour, and showcases the meticulous craftsmanship of these milled putters.

ODYSSEY ELEVEN PUTTERS

Our Most Exciting Shape

Re-writing the rules of what can be expected from a putter, the new Eleven shape combines the #1 insert on Tour with our Stroke Lab shaft technology and a unique head shape that delivers the outstanding MOI you would expect from a mallet with a forward cg that delivers all the benefits of a blade.

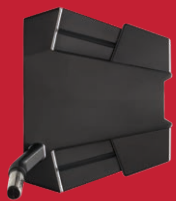

To help golfers aim better, we have three outstanding options: a Tour Lined version, a Triple Track alignment system offering, and a classic, unlined model. There's an Eleven for everyone.

Red Stroke Lab Shaft

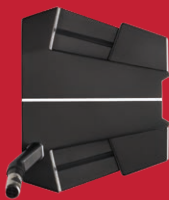

As seen on TV - especially on Sunday afternoon! Our latest generation shaft was introduced last season, and now features even better performance than the original! By shortening the steel section, we reduced the weight by seven grams. We also made it stiffer and more stable for even more consistency in your stroke, and your performance. Stroke Lab works, that's why it's winning major championships and dominating at the world's biggest events.

White Hot Insert

The most popular putter insert of all time is back with the original formulation, feel, sound, and performance.

2-ball Tens

A DRAMATICALLY BETTER PUTTER.

NOW DRAMATICALLY BETTER.

OUR MOST EXCITING HEAD SHAPES

We've enhanced the Ten shape that's incredibly popular on Tour and with golfers. It's sleeker, more forgiving, and now you can choose from impressive options in our 2-Ball or Triple Track to help improve your alignment. This is our best 2-Ball model ever, and these features are engineered to help you frame the ball at address with your intended line.

RED STROKE LAB SHAFT

As seen on TV – especially on Sunday afternoon! Our latest generation shaft was introduced last season, and now features even better performance than the original!

By shortening the steel section, we reduced the weight by seven grams. We also made it stiffer and more stable for even more consistency in your stroke, and your performance. Stroke Lab works, that's why it's winning major championships and dominating at the world's biggest events.

WHITE HOT INSERT

The most popular putter insert of all time is back with the original formulation, feel, sound, and performance. When Tour players and recreational golfers asked us to re-introduce it, we listened.

THE HOTTEST INSERT ON TOUR IS NOW HOTTER THAN EVER

White Hot Insert

The most popular putter insert of all time is back with the original formulation, feel, sound, and performance. When Tour players and recreational golfers asked us to re-introduce it, we listened.

Milled Surface Finish

A rich silver PVD finish, combined with fine milling on the surfaces, gives these putters an ultra-premium look, unlike any White Hot you've seen. They're beautiful and will appeal to golfers that appreciate the look of a milled design.

High Performance Shafts with New Pistol Grip

Available in a premium steel shaft or our red Stroke Lab shaft; both options are fitted with a New Pistol Grip. We've made Stroke Lab stiffer and more stable for even more consistency in your stroke, and your performance. It's winning major championships and dominating at the world's biggest events.

X-ACT™ CHIPPERS

BUILT TO GIVE YOU MORE CONFIDENCE AROUND THE GREEN

The X-Act Chipper is a new short-game option that promotes more consistent contact and distance control. It's engineered like an Approach Putter, providing an easy-to-hit option that plays comfortably between a putter and a wedge for shots around the green. The Injection Molded Urethane insert and hybrid-like sole construction help get the ball out of trouble and rolling right to the hole. Chipping just got a whole lot easier.

X-Act Sole

Hybrid-like sole design improves turf interaction around the green, especially on tight lies, to help eliminate stubbed or bladed chip shots.

Injection Molded Urethane Insert

This grooved urethane insert provides excellent feel for both long and short shots around the green.

Chipper Grip

The oversized, non-taper grip design helps stabilize the wrists and hands through impact. The longer design also allows you to put your hands in different positions to get the correct feel on a variety of shots.

WOMENS ROGUE ST

OUR FASTEST, MOST STABLE DRIVER EVER

THIS IS SPEED TUNED

The New Rogue ST Family represents the next step in our quest to continue pushing the boundaries of innovation. Like a Formula 1 racing team that analyzes and makes improvements to every element of the car to achieve maximum performance, our R&D and Engineering teams have re-invented, refined, and improved every element of each club while developing the Rogue ST Family.

CORE TECH

TUNGSTEN SPEED CARTRIDGE WITH ANODIZED ALUMINUM BACK CAP
Increases speed on off-center hits. It also adds stability at impact, and enhances MOI.

JAILBREAK A.I. SPEED FRAME

New A.I. driven design provides stability and adds even more ball speed.

SPEED TUNED A.I. FACE

New A.I. optimization formula now includes speed, launch, & spin.

NEW UNIBODY CONSTRUCTION WITH TRIAXIAL CARBON CROWN & SOLE
Promotes increased stability, saves weight, and adds forgiveness.

ROGUE ST MAX D

Rogue ST Max D is for the golfer that needs a high level of draw bias from their driver. It's built for very high MOI, with a more upright lie, reduced face progression, along with internal and external draw weighting, and a generous/stretched profile at address for maximum shot shape correction.

CALLAWAY UNIVERSAL

DIAMOND UNIVERSAL

BIG BERTHA
REVA

DISTANCE DESIGNED FOR WOMEN

Designed For Women To Unlock Your Inner Distance

We looked extensively at player performance data to build a driver that unlocks your distance. The lofts, swingweights, shafts and head shapes are all optimized to help you hit your tee shots a lot farther.

And if you want to hit the ball farther, you have to hit it straighter. So to help eliminate your slice or big miss, we've created our first high launch driver with an ultra-low forward CG for low spin. We hope you're ready for more distance, a more consistent ball flight, and more tee shots that find the fairway.

Easy To Hit From Bertha Shaping and Added Draw Bias

The high MOI Big Bertha head is specifically engineered with internal draw bias weighting to help improve your launch angles and promote a straighter, longer ball flight.

Fast Ball Speed From Our A.I. Designed Flash Face SS21

We've advanced our A.I. designed Flash Face to promote fast ball speeds across a more expansive area in each model and loft. So you'll still hit it a long way, even when you miss the center of the face at impact.

Super Strength Titanium For Consistent, High Ball Speeds

This face architecture requires extremely strong materials that are lighter and stronger than traditional titanium to promote optimal speed, forgiveness, and spin characteristics.

Jailbreak + T2C Triaxial Carbon Crown For Ball Speed and Unconventional Forgiveness

Two internal Jailbreak bars stiffen the body of the driver, allowing the face to flex more, while the significantly lighter carbon crown allows us to redistribute weight for higher MOI.

Premium Components Package

Features a speed-enhancing RCH 40 Shaft and a premium Lamkin Women's ST Soft Grip.

*Effective Jan 1, 2020, all club lengths will be based on USGA measurement procedures. Some measured and thus published lengths have changed but the actual club lengths are the same as previous models. Shaft specifications may vary due to cut length and manufacturer tolerances. Shaft weights supplied indicate weight class (40/50/60/70g). Actual weight is dependent on flex and cut length.

BIG BERTHA REVA

DISTANCE DESIGNED FOR WOMEN

Designed For Women To Unlock Your Inner Distance

We looked extensively at player performance data to build fairway woods that unlock your distance. The lofts, swingweights, and shafts are all optimized to help you hit the ball a lot farther.

Easy To Hit

Big Bertha REVA is also remarkably forgiving with a shallower face, progressive lengths, and an oversized Bertha shape promote consistent contact and smooth turf interaction.

Straighter Ball Flight From Increased Offset

We've added offset to reduce slices and promote distance-enhancing draws.

High Ball Speeds From Flash Face SS21 + Jailbreak Technology

Our advanced A.I. design promotes fast ball speeds across an expansive area of the face while Jailbreak bars connect the crown and sole to increase stiffness and promote even more speed.

Premium Components

Features a lightweight RCH shaft, designed by Callaway to specifically enhance swing speed, and a premium Lamkin Women's ST Soft Grip.

CALLAWAY RCH WOMENS WOODS
40g (LL, WMS) • 50g (WMS)

*Effective Jan 1, 2020, all club lengths will be based on USGA measurement procedures. Some measured and thus published lengths have changed but the actual club lengths are the same as previous models. Shaft specifications may vary due to cut length and manufacturer tolerances. Shaft weights supplied indicate weight class (40/50/60/70g). Actual weight is dependent on flex and cut length.

BIG BERTHA
REVA

DISTANCE DESIGNED FOR WOMEN

Designed For Women To Unlock Your Inner Distance

We looked extensively at player performance data to build hybrids that unlock your distance. The lofts, swingweights, and shafts are all optimized to help you hit the ball a lot farther.

Fast Ball Speeds From Flash Face SS21

Fast ball speeds across an expansive area in each model and loft, with our advanced A.I.-designed Flash Face. So you'll hit it long, even if you miss the center of the face at impact.

Straighter Ball Flight From Increased Offset

We've added more offset to help reduce your slice or big miss. This increased offset helps to promote a straighter ball flight for more distance.

Enhanced Launch and Trajectory Control From Dual MIM'ed Tungsten Weighting

Optimized CG for launch and stability from precisely shaped dual MIM'ed tungsten weight.

Increased Ball Speed And Easy Launch

Features a completely new RCH shaft, designed by Callaway to specifically enhance the Big Bertha offering, with an Active Tip Flag section for easy launch. And it comes stock with a Golf Pride Tour Velvet Soft Grip.

Premium Components

Features a completely new RCH shaft, designed by Callaway to specifically increase your swing speed, along with a premium Lamkin ST Grip.

DISTANCE DESIGNED FOR WOMEN

Designed For Women To Unlock Your Inner Distance

We looked extensively at player performance data to build an irons set that unlocks your distance. The lofts, swingweights, and shafts are all optimized to help you hit the ball a lot farther.

Amazing Forgiveness From Legendary Big Bertha Shaping

This club profile that golfers love is engineered to give you more confidence over the ball with noticeably wider soles. For easy launch, lower spin and straighter shots, we've added more offset. Combined with our Flash Face Cup, we've developed a NEW formula for distance and forgiveness in a women's iron.

Higher Launch From Our Visible Tungsten Energy Core

We've added a significant amount of custom tungsten weighting. So we can deepen the CG in each iron with extraordinary precision, while still maintaining ball speed in the Flash Face Cup. Now you can get higher launch conditions through the set.

Pure Feel From Urethane Microspheres

Our patented urethane microspheres comprehensively absorb unwanted vibration for exceptional feel, while also maintaining fast ball speeds.

Premium Components Package

Features a speed-enhancing RCH Shaft and a premium Lamkin Women's ST Soft Grip.
